Looking forward statement

Certain information set forth in our webinar may contains “forward-looking information”, including “future oriented product or financial information” and “product or financial outlook”, or “market prediction” under applicable securities laws (collectively referred to herein as forward-looking statements).

Forward-looking statements are provided to allow potential investors, customers, suppliers, existing or targeted employees, market participants or stakeholders the opportunity to understand management’s beliefs and opinions in respect of the future so that they may use such beliefs and opinions as one factor in evaluation.

These statements are not guarantees of future performance and undue reliance should not be placed on them. Such forward-looking statements necessarily involve known and unknown risks and uncertainties, which may cause actual performance and financial results in future periods to differ materially from any projections of future performance or result expressed or implied by such forward-looking statements.

Although forward-looking statements contained in this webinar are based upon what management of the Company believes are reasonable assumptions, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update forward-looking statements if circumstances or management’s estimates or opinions should change except as required by applicable securities laws. The reader / webinar / conference participant is cautioned not to place undue reliance on forward-looking statements.

Any purchasing decisions regardless of shares of companies listed or not listed or purchase of product and services shall be strictly based on today available, visible information without taking any future predictions or any information which are or could be interpreted as “forward-looking information”.

Key Features

Device Management

Manage and monitor all devices, device groups or device models. Check device information and assign tasks

System Updates

Run driver updates, application updates, OS and BIOS updates, all done remotely to all your devices

Lifecycle Tracking

Track the lifecycle of your hard drive. Check potential errors in reading and writing to predict possible failures

Task Management

Manage your daily, weekly or instant tasks of your devices. Schedule the tasks at night time or let the operator approve them on site

Real-Time Detection

Check in real-time if any exceptions occur and check the device status

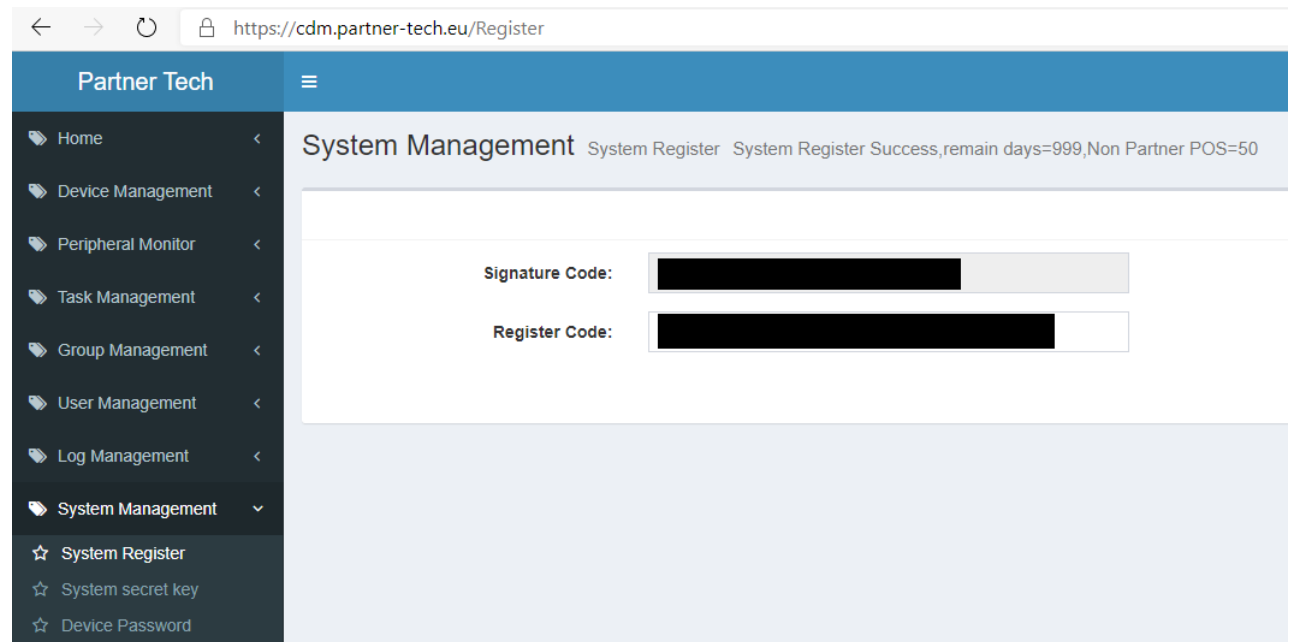

Collaboration Maintenance

Collaborate between different regional offices for services and maintenances

Business Models

Free Of Charge until 2021!

1. Cloud server hosted by Partner Tech Europe
2. On premise server infrastructure
3. Integrated solution via REST API
